Sealed against dust, oil, grease, liquids, vapor and mud

Designed for high shock and vibration applications

Electrically isolated from motor shaft
 Rugged cast-aluminum housing
 Advanced ASIC technology and optics
 Easy, hex wrench installation
 High temperature range: -40 ... +100°C

HEAVY DUTY (F

**EXTREME HEAVY DUTY HOLLOWSHAFT ENCODER** 

and increasing life-cycle costs. Hengstler has the solution.

#### **GENERAL INFORMATION**

APPLICATIONS

APPLICATIONS

TECHNICAL DATA mechanical not fatigue under vibration. Electronics are condensed down to a single ASIC, reducing the likelihood of electronic component failure. The HSD44 is designed for end-of-motorapplication. Adapter plates are available for common motor styles, and custom adapter plates can be created to fit any application. The HSD44 is the ideal source of control feedback formotors that drive heavy electric, and

The HSD44 is the ideal source of control feedback formotors that drive heavy electric, and hybrid-electricvehicles. It is field proven for reliable operation insevere transportation and industrial environments.

Even electric motors in the harshest environmentsrequire feedback to ensure smooth speed control. In the past, engineers have applied encoders and sensors designed for standard industrial environments into these extremely harsh environments, impacting system reliability

The heavy rail proven NorthStar HSD44 series optical encoder was designed to be a survivor. This anodized aluminum encoder can survive high levels of shock and vibration, wide temperature extremes, and operating environment contaminants. The HSD44 can withstand

The 1024 pulses-per-revolution (PPR) are provided by arugged, stainless steel disk, which is read from aspecially designed optical sensor. An enormous 0.025"sensor gap reduces sensitivity to shock, vibration, and motor bearing wear. The counter-spiral shaft-coupler-provides a flexible mount that eliminates resonance throughout the operating range and will

the harshest outdoor environments and the toughest industrial applications.

### **Designed for :**

- Heavy Rail
- Commercial Hybrid Electric and Electric Vehicles
- Heavy Duty cranes
- Mining Transport
- Conveyors

#### **INDUSTRIES**

Transportation, paper, steel, mining, material handlingand other industries with harsh environments whereprecise and reliable encoder feedback is needed.

Housing diameter	112 mm
Mounting depth	60 mm
Shaft diameter	16 mm (Flexible coupling)
Protection class shaft input (EN 60529)	NEMA 6 IP67
Shaft tolerance	11.9 to 15.9 mm
Max. speed	max. 6000 rpm
Bearing life	max. 5 x 10 <sup>11</sup> revs.

TECHNICAL DATA electrical

ELECTRICAL CONNECTIONS Cable, MS connector 10 poles

# Heavy Duty

### Incremental

Vibration resistance (DIN EN 60068-2-6)	30 g
Shock resistance (DIN EN 60068-2-27)	200 g
Operating temperature	-40 °C +100 °C
Material housing	Hard anodized Aluminum
Weight	ca. 1.8 Kg
Connection	MS, radial Cable, radial with M12 connector
Supply voltage	DC 5-30 V
Current w/o load typ.	50 mA
Code	Incremental, optical
Max. pulse frequency	125 kHz
Phasing	Incremental signals (A leads B): A leads B by 90° for ccw shaft rotation viewing the shaft clamp end of the encoder

Kabelfarbe	Stecker	Signal
braun	А	Sig.A
orange	В	Sig.B
gelb	С	Sig.Z
